Review notes

Regional Market Review (sample), converted into Northwind sample template.

Ready to send

• 5 slides placed into the client template “Northwind sample template”, each keeping its own layout. No slide was marked for a check.

What we checked

OK: Same slide count: 5 in, 5 out

OK: No missing words found: 121 checked

OK: No missing or changed numbers found: 10 checked

Good to know

• Slide check: we added alt text to 1 picture and charts.

• You chose not to use AI for this deck. Chart pictures stayed pictures, slides whose words are drawn as shapes kept only their titles as text, and any brand guide or notes were not read.

Slide 1

Before

After

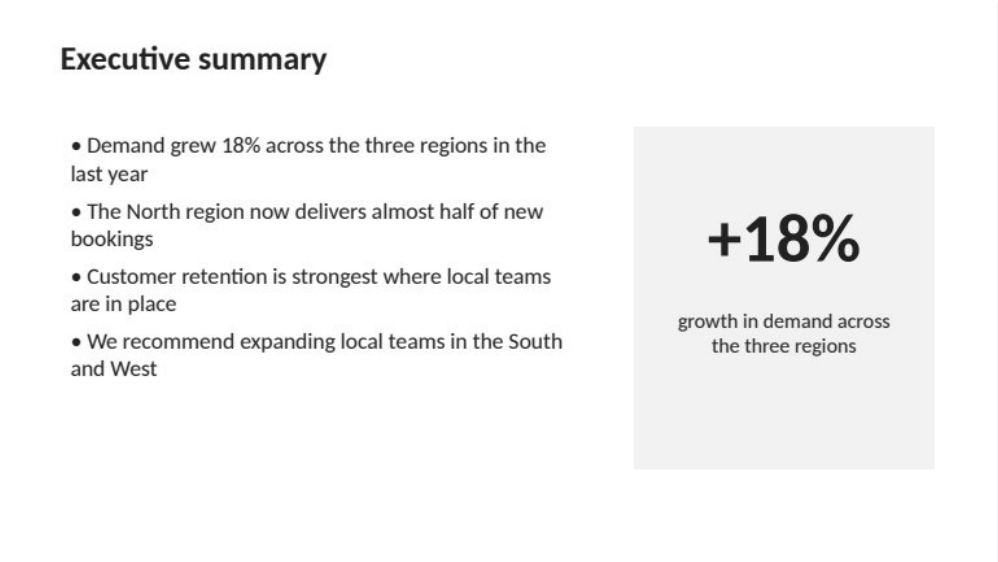

OK: Checked on this slide: 13 words from your file, none missing or changed.

Nothing was marked on this slide.

Slide 2

Before

After

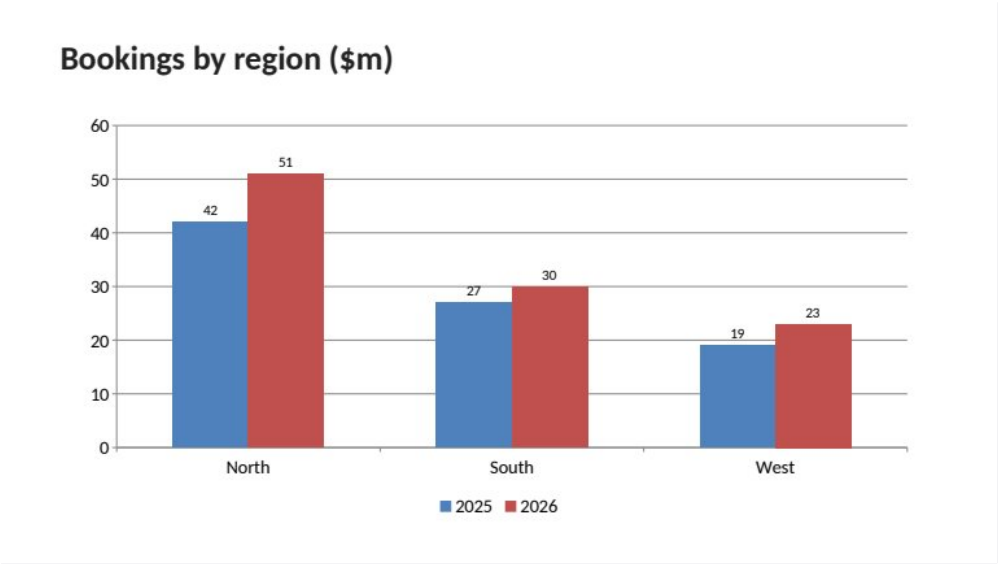

OK: Checked on this slide: 51 words and 2 numbers from your file, none missing or changed.

Suggestions (about your content; nothing was changed)

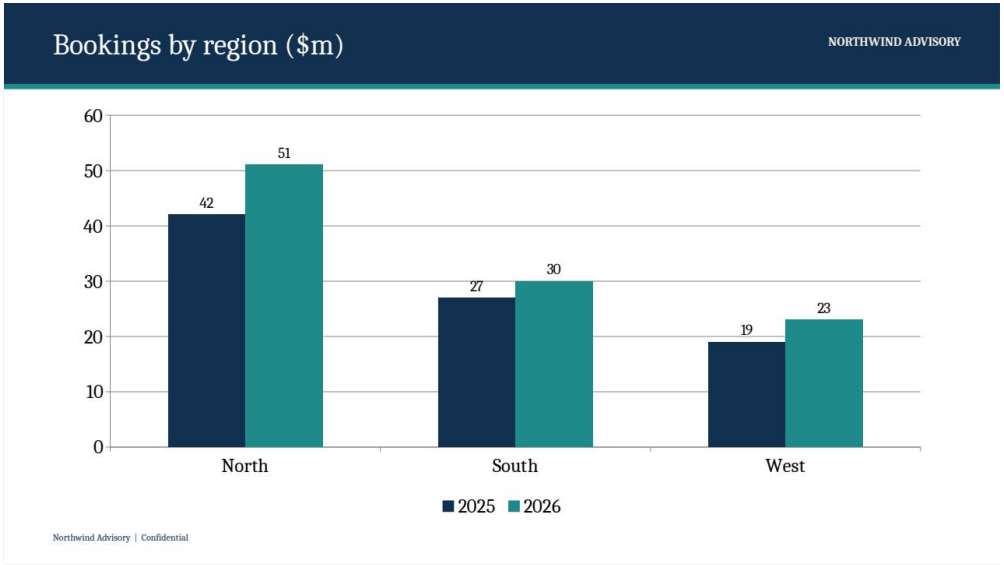

- **No slide title**
  A title helps people follow the story, and screen readers use it to find the slide (PowerPoint's accessibility checker asks for one).

Slide 3

Before

After

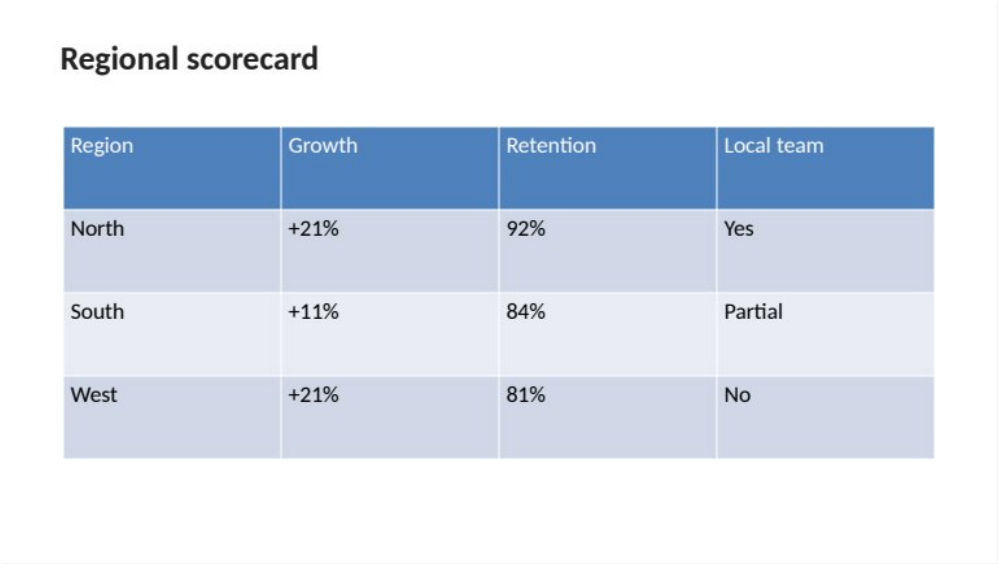

OK: Checked on this slide: 9 words from your file, none missing or changed.

Suggestions (about your content; nothing was changed)

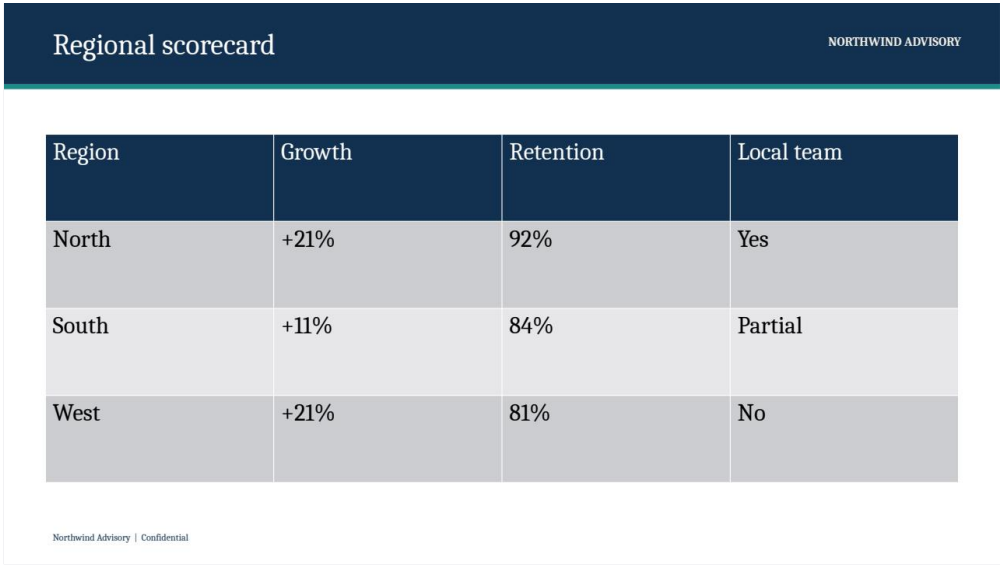

- **No slide title**
  A title helps people follow the story, and screen readers use it to find the slide (PowerPoint's accessibility checker asks for one).

Slide 4

Before

After

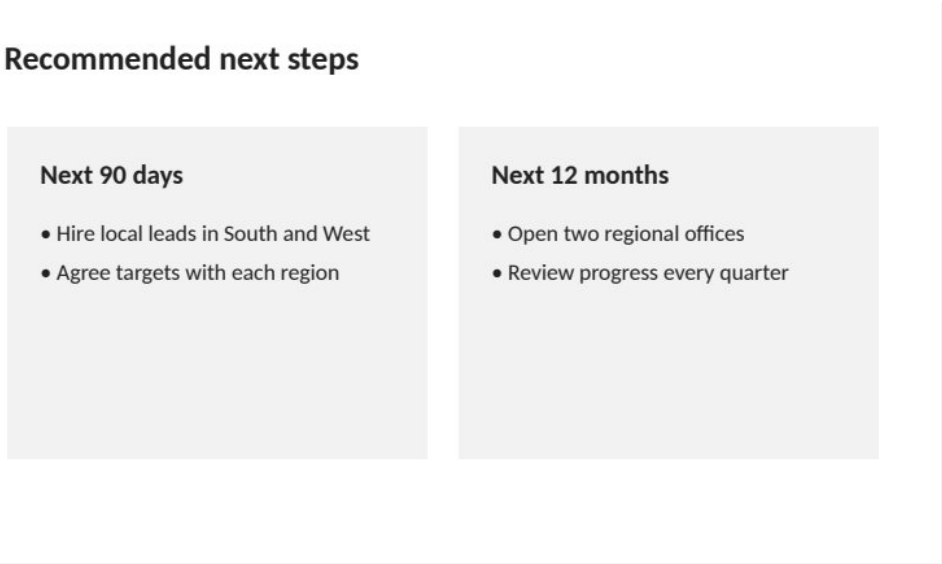

OK: Checked on this slide: 19 words and 6 numbers from your file, none missing or changed.

Suggestions (about your content; nothing was changed)

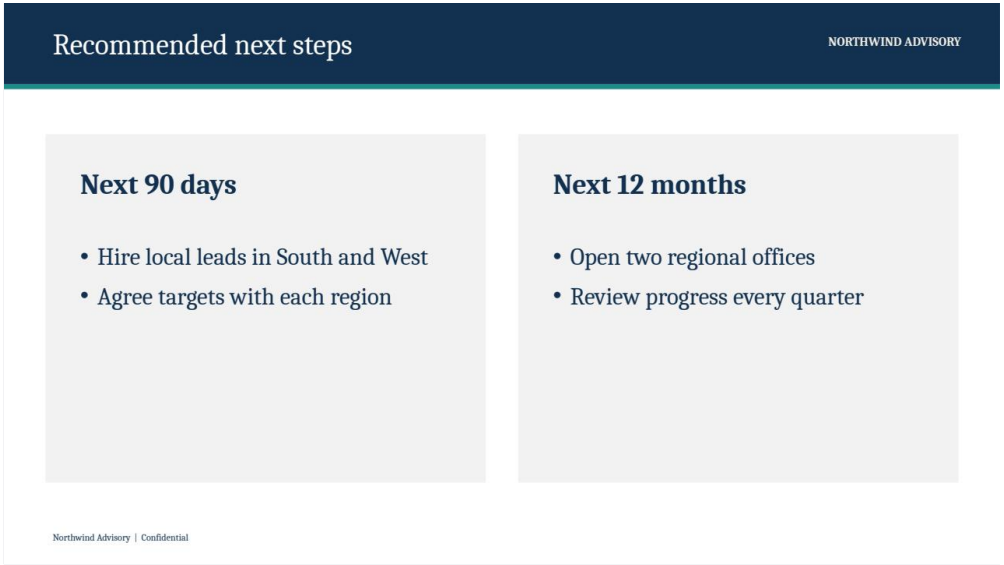

- **No slide title**
  A title helps people follow the story, and screen readers use it to find the slide (PowerPoint's accessibility checker asks for one).

Slide 5

Before

After

OK: Checked on this slide: 29 words and 2 numbers from your file, none missing or changed.

Suggestions (about your content; nothing was changed)

- **No slide title**
  A title helps people follow the story, and screen readers use it to find the slide (PowerPoint's accessibility checker asks for one).
